# GOOGLE GEMINI 3 PROMPTS

---

## Prompt 1

Use the uploaded reference photo of me as the primary identity source.

Preserve my face exactly as in the uploaded image — same facial structure, skin tone, proportions, facial asymmetry, eyes, nose, lips, jawline and natural skin texture.

Do not beautify, stylize, or alter my identity.

Create an ultra-realistic, high-resolution fashion editorial portrait with a bold, confident, runway-inspired attitude.

### Pose & Attitude (Very Important)

Subject centered in the frame

Body slightly angled (not straight-on)

One hand inside the trouser pocket

Other hand gripping the collar of the puffer jacket

Chin slightly raised

Strong, dominant runway-style expression

Confident, stylish, high-fashion presence

### Outfit Styling (Exact)

White puffer jacket, worn open (realistic fabric volume and stitching)

Black T-shirt underneath, clean and minimal

Black jeans, well-fitted

Outfit should look premium, fashion-editorial ready, with natural folds and texture

### Studio Environment

Clean, minimalist indoor studio

Neutral tones (off-white / light grey)

Subtle vertical panel wall in the background, positioned slightly offset to the right

No clutter, no props, pure fashion focus

### Lighting Design

Soft diagonal studio lighting coming from one side

Gentle highlights on face and jacket

Controlled shadows adding depth and attitude

Balanced exposure, no harsh contrast

Editorial fashion lighting, not cinematic drama

📷 Camera & Depth

Professional fashion photography look

Eye-level or slightly low camera angle

Medium to tight portrait framing

Shallow depth of field:

Face and upper body in crisp focus

Background softly blurred but still readable

Natural lens behavior, no artificial blur

🚫 Strict Realism Rules

Zero AI smoothing

No plastic or over-retouched skin

Visible skin pores and fine details

No cartoon, illustration, or stylized look

No exaggerated proportions

Real-world lighting and textures only

✅ Final Output Goal

The image should look like a luxury fashion magazine editorial shoot, captured in a professional studio with a confident, dominant runway attitude — ultra-real, high-res, and publication-ready, not AI-generated.

## Prompt 2

Use the uploaded reference image of me as the primary identity source.

Preserve my face exactly as in the uploaded image — same facial structure, skin tone, proportions, facial asymmetry, eyes, nose, lips, jawline, and natural skin texture.

Do not stylize, beautify excessively, or change my identity.

Transform the image into a professional LinkedIn profile photo with a clean, corporate look.

👔 Clothing & Appearance

Dress me in formal professional attire, such as:

Tailored blazer or suit jacket

Formal shirt (white, light blue, or neutral tone)

Optional tie (subtle, professional)

Clothing should look realistic, well-fitted, and corporate

Neat grooming:

Clean hairstyle

Well-trimmed beard or clean shave

Natural, professional makeup (if applicable)

 Pose & Expression

Upright, confident posture

Shoulders relaxed but professional

Natural, approachable expression

Soft professional smile (not exaggerated)

 Background

Clean, distraction-free background:

Neutral studio backdrop (light grey, beige, soft blue)

OR a subtle blurred office environment

Background must not overpower the subject

 Lighting & Camera

Soft, even studio lighting

No harsh shadows

Balanced exposure

Natural skin tones

DSLR-style portrait photography

Eye-level camera angle

Sharp focus on the face with gentle background blur

 Quality & Style Rules (Strict)

Pure photorealism

No cartoon, no illustration, no artistic stylization

No dramatic or cinematic lighting

Corporate, polished, and trustworthy look

High-resolution, professional headshot quality

The final image should look like a real LinkedIn-ready corporate profile photo, suitable for job applications, professional networking, and company profiles, not an AI-generated image.

## Prompt 3

Use the uploaded reference photo of me as the primary identity source.

Preserve my face exactly as in the uploaded image — same facial structure, skin tone, proportions, facial asymmetry, eyes, nose, lips, jawline, Turban, beard, and natural skin texture. Do not beautify, stylize, or alter my identity.

Create a hyper-realistic, live-action portrait where I am standing near a sandstone arch, facing the Taj Mahal during golden hour sunset.

### Clothing & Styling (Exact)

Dark black winter jacket with realistic fabric texture

Grey wool scarf, naturally wrapped with soft folds

Black cargo pants, clean and well-fitted

Black Nike shoes, realistic shape and branding

Wristwatch on the wrist, subtle and realistic

Clothing should look natural, worn in real life, with correct folds, shadows, and fabric behavior.

### Pose & Expression

Standing naturally, relaxed but confident posture

Body oriented toward the Taj Mahal, head slightly turned

Calm, composed expression (no exaggerated smile)

### Location & Environment

Foreground: Sandstone arch with realistic texture and age marks

Background: Taj Mahal, slightly distant and naturally scaled

Environment should feel real, tourist-free, and peaceful

### Lighting & Atmosphere

Golden hour sunset light

Warm sunlight gently hitting my face and jacket

Soft, natural shadows

Subtle glow on sandstone and marble surfaces

Balanced exposure, no over-bright highlights

### Camera & Depth

DSLR-style photography

Eye-level camera angle

Shallow depth of field:

Face and upper body in sharp focus

Background softly blurred (natural bokeh)

Realistic lens behavior, no artificial blur

 Strict Quality Rules

Zero AI smoothing

No plastic skin

No cartoon or illustration look

No stylization or exaggeration

Natural skin pores, fine details, realistic textures

Believable real-world lighting and physics

 Final Output Goal

The image should look like a real travel photograph taken by a professional photographer at sunset, not an AI-generated image.
